

Cooper's Hawk
Accipiter cooperii

Atlas 1

Atlas 2

Comparison of Atlas Results

As noted in Chapter Five, the expansion of breeding Cooper's Hawks in Sacramento County occurred mainly in urbanized areas. Backyard birders should grow accustomed to seeing local Coops occasionally taking one of "their" feeder birds and just think of it as feeding the next trophic level up on the food pyramid.

Breeding Bird Survey Trend (1966–2019)

California	Rangewide ¹
0.56% / year ⁿ	1.39% / year ^s

¹North America; ^ssignificant, ⁿnonsignificant; Source: Sauer et al. 2020

Breeding Habitat

Wooded habitats, including urbanized areas

Nest Type

Stick nest in tree

12 June 2019

Block L-8

Landed at Western Kingbird nest in eucalyptus and apparently took chicks.
Driven off by at least ten kingbirds.
