

# Peregrine Falcon

## *Falco peregrinus*

Comparison of Atlas Results

As noted in Chapter Four, although Peregrine Falcons were confirmed as breeding in only one location, it is likely that, if they have not already expanded to more sites, they will in the future. Sacramento’s ample supply of Rock Pigeons should ensure a bright future for this awe-inspiring raptor.

Breeding Bird Survey Trend (1966–2019)

California	Rangewide <sup>1</sup>
3.41% / year <sup>s</sup>	2.1% / year <sup>s</sup>

<sup>1</sup>North America; <sup>s</sup>significant; Source: Sauer et al. 2020

Breeding Habitat  
Wide variety

Nest Type  
Scrape on a ledge

29 May 2020

Block G-5

Male brought in food (pigeon?) and female took it but then the male brought it back and fed the young.
